

Part 2: Late Dec/Early Jan 2025 Looking forward

Exercise 2.1 The Best Possible Self Exercise

Time needed: 20 minutes

This exercise was originally developed by researchers in the Netherlands to teach people to practice positive future thinking. In this exercise, you imagine your best possible self, write about what you imagine, then take a few minutes to solidify these images in your mind and heart.

Read the instructions below or listen to [me guiding you through the audio exercise](#):

- Begin by imagining your best possible self. “Imagine yourself in the future, after everything has gone as well as it possibly could. You have worked hard and succeeded at accomplishing all the goals of your life. Think of this as the realization of your dreams, and that you have reached your full potential. Thus, you identify the best possible way that things might turn out in your life.”
 - Just visualize this beautiful best-possible-life for one full minute.
- Now take fifteen minutes to write about your best possible self. (Just keep writing for the full time; if you get stuck, repeat what you have already written.)
- After writing, take a few more minutes to “imagine as vividly as possible the things you have been writing about...Imagine your ideal future life with as much detail as you can.”

Full citation: Peters, M. L., Flink, I. K., Boersma, K., & Linton, S. J. (2010). Manipulating optimism: Can imagining a best possible self be used to increase positive future expectancies?. *The Journal of Positive Psychology*, 5(3), 204-211

Exercise 2.2 Big Picture Planning

Time needed: 30 minutes

Instructions: Get comfortable, curl up in a quiet place with your favorite beverage. Look back on any of the previous prompts you completed and in a loose, creative, brainstorming mode, complete the following sentences:

- I really value:

- I love and hope for:

- Knowing these things, here are few things I really want in the new year:

- This year, here's what I'd like to add to my life

- This year, here's what I'd like to subtract from my life

--

Exercise 2.3 First Draft Annual Goals

Time needed: 30-60 minutes

Instructions: Make a list of goals or dreams you hope to achieve. These first draft ideas are

- (a) divided into the life buckets that are important to you and
- (b) delineated into what you want to maintain,
- what you want to get rid of,
- and what you want to add.

I suggest the **buckets** of self, love/family, community, and trade/profession.

- You pick what buckets work for you.
- Some people have additional buckets for service, religion, fitness, and making the world better.

Maintain: things that are going well or I am doing well and I want to continue

Self	Relationships/Love/Family	Community	Trade/ Profession

Subtract: things to politely decline or extract myself from this year

Self	Relationships/Love/Family	Community	Trade/ Profession

--	--	--	--

Add: new hopes, dreams, and goals I'd like to add this year

Self	Relationships/Love/Family	Community	Trade/ Profession

Coming up next time: “Part 3: Realistic Second Draft Quarterly Goals”
